-FDA Certified

Acme Item #330593 – 20/pack; 400/case

**Did You Know....** New evidence shows that coronavirus can remain suspended in the air (aerosolized) for several hours under experimental conditions. There are also some initial reports of detecting viral RNA in air samples from hospital settings where COVID-19 patients were admitted. Aerosols, which are less than 5 microns in diameter, are lighter and can travel much farther than respiratory droplets. An infected person could produce aerosolized virus by talking or breathing. You could then breathe in contaminated air and become infected.

# FACESHIELDS

## Anti-Fog Protective Face Shield (GOOD)

- For Single Use
- Anti-fog
- Anti-saliva splashing
- Spit guard
- Adjustable strap

\*Shields have not been tested or approved by any regulatory body. The factory does not guarantee that these shields will protect against contracting COVID-19

### Dilution Rates

- Sanitization of glassware, pots, etc: Add 1 oz per 4 gallons of water. No potable rinse required.
- General Disinfection: Add 3 ounces per 5 gallons of water.
- Hospital Disinfection: Add 3.5 ounces per 5 gallons of water.
- COVID-19 dwell time – 10 minutes

Acme Item # 513562 – 4/1 Gallon

# DISINFECTANTS

## Fight-Bac Ready to Use Disinfectant

This quaternary based, anti-bacterial cleaner is an ideal disinfectant for use in hospitals, nursing homes, schools and hotels.

- Meets requirements of OSHA Bloodborne Pathogen Standard
- COVID-19 dwell time – 10 minutes

**Acme Item #566311 - 12/case**

## Two-Step Cleaning and Dwell Times ...

For maximum effectiveness, we recommend using the two-step cleaning process to help prevent the spread of disease-causing pathogens.

**Step one:** Clean and remove unwanted soils from surfaces using a cleaning solution with a microfiber. This will help to remove potential microbial harborage areas.

**Step two:** Apply a disinfecting solution to surfaces while adhering to the manufacturer recommendations for dilution, safety, and dwell time. Finally, after waiting for the recommended dwell time, remove the solution with a wet/dry vacuum or microfiber.

# WIPER BUCKET

## Multi-Task Wiping System

An Easy to Use Wiping System for Every Environment

- Convenient and easy to use bucket with dispensing lid.
- Use with a variety of disinfecting solutions.
- Enclosed lid system to reduce the risk of cross contamination.

# HOW TO PROPERLY WEAR A FACE MASK

## WEARING THE FACE MASK

1

Clean your hands with soap and water or hand sanitizer, then remove a mask from the box. Make sure there are no obvious tears or holes in either side of the mask.

2

Keep the white side towards your face with the nose clip, or stiff bendable edge at the top.

3

Hold the mask by the ear loops and place a loop around each ear.

*\*\*See below if your mask has ties or bands.*

4

Press the nose clip to the shape of your nose and pull the bottom of the mask over your mouth and chin.

- Face masks with ties - Bring the mask to your nose level and place the ties over the crown of your head and secure with a bow.
- Face Mask with Bands - Hold the mask in your hand with the nosepiece or top of the mask at fingertips, allowing the headbands to hang freely below hands. Bring the mask to your nose level and pull the top strap over your head so that it rests over the crown of your head. Pull the bottom strap over your head so that it rests at the nape of your neck.

## REMOVING THE FACE MASK

- Clean your hands with soap and water or hand sanitizer before touching the mask. Avoid touching the front of the mask to avoid contamination. Only touch the ear loops/ties/band.
- Follow the instructions below for the type of mask you are using
  - Face Mask with Ear loops: Hold both of the ear loops and gently lift and remove the mask.
  - Face Mask with Ties: Untie the bottom bow first then untie the top bow and pull the mask away from you as the ties are loosened.
  - Face Mask with Bands: Lift the bottom strap over your head first then pull the top strap over your head.
- Throw the mask in the trash. Clean your hands with soap and water or hand sanitizer.

# HAND HYGIENE REGIMEN FOR HANDWASHING

1

Wet hands under warm running water. Leave water running.

2

Dispense soap.

3

Rub hands palm to palm.

4

Rub right palm over top of left hand with interlaced fingers. Repeat with left palm over top of right hand.

5

Rub palms together with fingers interlaced.

6

Rub backs of fingers to opposing palms with fingers interlocked.

7

Rotate rubbing the left thumb clasped in the right palm. Repeat with right thumb clasped in the left palm.

8

Rotate rubbing, backwards and forwards with clasped fingers of your right hand in your left palm. Repeat with left hand in right palm.

9

Rinse hands thoroughly with running water.

10

Dry with clean paper towels. Turn water off using a towel. The total process should take approximately 40-60 seconds.

# HAND HYGIENE REGIMEN FOR SANITIZING

**1**

Place enough product in your palm to thoroughly cover your hands.

**2**

Rub hands palm to palm.

**3**

Rub right palm over top of left hand with interlaced fingers. Repeat with left palm over top of right hand.

**4**

Rub palms together with fingers interlaced.

**5**

Rub backs of fingers to opposing palms with fingers interlocked.

**6**

Rotate rubbing the left thumb clapsed in the right palm. Repeat with right thumb clapsed in the left palm.

**7**

Rotate rubbing backwards and forwards with clapsed fingers of your right hand in your left palm. Repeat with fingers of your left hand in your right palm.

**8**

The total process should take approximately 20 seconds. Once your hands are dry they are safe for caring for patients.
