Acme Paper & Supply Co. helping Congress go green

Baltimore Business Journal - by [Ryan Sharrow](#) Staff

A Jessup supply company is contributing to the U.S. House of Representatives' green efforts.

Acme Paper & Supply Co. is teaming up with the House of Representatives' caterer, **Restaurant Associates**, to provide environmentally friendly food service products.

Acme and New York-based Restaurant Associates will outfit the House's six restaurants and cafeterias with the green supplies. They include environmentally friendly packaging and products that naturally biodegrade in 30 days.

Items include cups, plates, bowls and cutlery -- all made from natural substances.

The initiative is part of U.S. House Speaker Nancy Pelosi's "Greening the Capitol" plan.
